STG02 - AHU TEMPERATURE AND HUMIDITY CONTROLLER

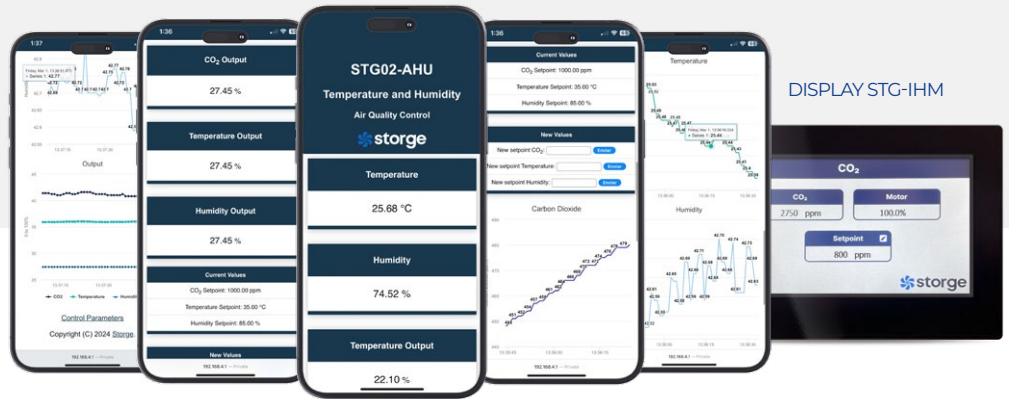

**CONTROLLER
STG02 - AHU
TEMPERATURE
AND HUMIDITY**

The STG Controllers are an easy way to automate ventilation systems and promote thermal comfort and air quality for your business.

The products feature temperature, humidity, carbon monoxide, carbon dioxide, volatile organic Compounds and fine particulate matter sensors, with the possibility of customization according to the project and software personalization for your application.

They are precise in variable control, easy to install, and can be easily accessed through their WI-FI interface, or the STG-IHM Touch Screen, offering both analog (0-10V) and digital outputs for each parameter.

**SPECIFICATIONS
STG02 - AHU
TEMPERATURE
AND HUMIDITY**
